

## GLASS BASKETBALL BACKBOARD 90X120 CM

### ■ Product description

Professional basketball backboard 90x120 cm, acrylic glass with thickness of 10 mm on a steel frame with a special mounting system for the glass part. The frame of the backboard is made of steel profiles 50x40 mm, the plate under the ring has a thickness of 10 mm. The glass is fixed to the frame by a pressure frame ( non-hole system ) that is made of special bevels 50x50 mm ( bended press brakes ).

### ■ Additional information

The glass does not have the direct contact with the frame because of a special gasket that amortizes the vibration.
