

ALUMINIUM PROFESSIONAL VOLLEYBALL POSTS

■ Product description

Aluminium professional volleyball posts, multifunctional, made from oval reinforced aluminium profiles 100/ 120 mm, mounted in sockets. The tensioning mechanism is based around a bolt placed inside the post, which can be moved using a cam keeper, and which facilitates adjusting and locking of the tensioner of the net at a specific position by tightening the locking mechanism. Five mounting points of the net for tensioning at every post. Smooth and easy mechanism for adjusting height of the net

■ Additional information

Each post has the ability to install a tensioning mechanism on both sides, which makes it possible to use it as an intermediate post.
