

PROFESSIONAL GYMNASTIC SPRINGBOARD

■ Product description

Professional Gymnastic Springboard - equipment used for gymnastic exercises with other devices (vaulting boxes, horses, bucks). High performance springboard is made out of high quality elastic plywood shapes with dimensions of 1200x600mm. The top surface is equipped with a resilient mat, which is placed under the carpet floor-covering. In addition, the high performance springboard has steel springs and foam bumpers that ensure the greatest possible resilience and comfort of exercise. The springboard is designed for school use under the supervision and for advanced gymnasts.

■ Additional information

Springboard meets the requirements of the standard EN-913
