

STABLE TRIBUNE, LANDINGS MADE OUT OF WEMA LATTICE

■ Product description

Outdoor stable tribune with plastic seats, landings made out of WEMA lattice. Quantity of rows from 2 to 16. Steel construction hot dip galvanized and/or powder painted.

■ Additional information

The tribune construction consists of welded frames which are made of sealed steel profiles with a cross-section of 40x40. The frames are joined together by beams which are made out of sealed steel profiles with a cross-section of 60x40, they are also a underconstruction for the landings. The landings are made out of bridging lattices which are welded and hot dip galvanized. Barriers are made out of sealed steel profiles 40x40 and completed with steel bevels 25x25. Steps are made out of sealed steel profiles 40x40.
