

SEAT COLLEGE

■ Product description

Universal design of the College line will work both in auditorium and sports halls. The great advantages of this chair are durability and the possibility of flexible arrangement of space. The materials used are good quality and durable, and at the same time affordable. The supporting structure of the chair is made of a frame made of powder-coated steel. The seat has been contoured and rounded at the edges, which gives a sense of comfort. The backrest ensures proper support of the spine. The seat and back are made of multilayer beech plywood.

■ Additional information

College chairs allow for smooth adjustment of width between adjacent places thanks to the flexible row connection solution. A folding seat, which facilitates the transition, is also an advantageous solution. They are also available in versions with upholstered pads.
