

## SEAT SIBIO

### ■ Product description

Modern cubic-shaped chair, mounted to the anchor beam to the forehead of the step or to the ground. Its seat and back are made of profiled beech plywood and equipped with upholstered overlays. The backrest is available in three height variants. The chair has a silent, spring folding mechanism.

### ■ Additional information

The chairs can be equipped with armrests made of polyurethane foam or solid beech wood, mounted to the supporting beam as an element independent of the chair. The additional option is to change the angle of the position relative to the stand from -15 to + 15 degrees. In addition, the version for telescopic bleacher is equipped with a manual assembly system for chair sets and, optionally, gas springs.
