

## SEAT EVORA

### ■ Product description

Modern chair with a bucket construction, made of multilayer beech plywood. The seat has an upholstery pad which increases the comfort of use. A wide range of finishes allows the materials to match the preferences of the customer and the character of the interior. The chair is attached to the metal frame by means of screws hidden under the upholstery pad. Aesthetic numbering mounted in the recess of the seat.

### ■ Additional information

The unusual shape of the chair influences the aesthetic impression of the spectators, and at the same time provides them with high comfort.
