

SEAT VISION SPORT

■ Product description

Functional and aesthetic plywood chair. The backrest tapered upwards gives the product a light touch. Proper profiling and rounded edges of the seat, which minimize pressure under the knees, ensure the comfort of the spectator. The chair can be fitted with steel armrests with pleasant wooden covers.

■ Additional information

The design of the Vision Sport chair is made of powder coated steel. The back and seat is made of multi-ply beech plywood. The seat folds automatically, providing wide passages in rows. Vision Sport may have acoustic panels installed from the bottom of the seat, which positively affects its sound-absorbing properties. Thanks to this, the chair is suitable for rooms where mass events are organized. Its parameters and simple, industrial design make the chair perfect for both sports halls and multifunctional facilities.
